

DRYERS

PIT DRIER

Custom designed to suit varying work handling techniques and plant layout, Precimax driers can increase galvanizing bath throughput and minimize the incidence of zinc splash. Precimax has designed and installed

- Tunnel driers
- Pit driers
- Compartment driers
- Converyorised driers

FOUR (4) POSITION DRIERS

High air flow gives uniform drying with

low heat input. It is often possible to use waste gases from the furnaces as a source of heat.

TUNNEL DRIER
